HIGHLIGHTS

BEING A BETTER SCIENTIST

A PAIR OF ARTICLES FROM DR. PLEUNI PENNINGS' BLOG

MEET FAYE

My name is Faye and I'm a recent graduate from San Francisco State University. I obtained a bachelor's degree in Cell and Molecular Biology with a minor in Computing Applications from the PINC Program.

PINC SUMMER PROGRAM

The PINC Summer Program is a part-time program where students work in teams with a peer-mentor. They learn coding skills as well as work on a research project with their mentor and a faculty advisor. At the end of the 9-week program,

PUBLICATIONS

2021 ASEE VIRTUAL ANNUAL CONFERENCE

A strong Computer Science (CS) identity increases retention in the field, and promoting the establishment of such an identity in underrepresented (UR) students - including women and Black, Latinx, and Native American individuals - is a crucial component of any successful attempt to diversify the field. Exposure to relatable role models can contribute to the development of professional identity, and has been shown to increase student achievement and persistence in STEM.

OUR PROGRAMS

GSTAR CERTIFICATE

Beginning this semester, the Data Science and Machine Learning for Biotechnology Certificate Program, offers students a 12 unit pathway to a certificate that will give them the technical and professional skills needed to work in the biotech and pharmaceutical industries. The curriculum was co-developed by San Francisco State University faculty and Genentech researchers.
